DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 28-35 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 28 "essentially consists of" is confusing. It would be clearer if applicant stated instead, "consists essentially of" to more grammatically define the claim. Further, it would be clearer if applicant said "pneumonia" instead of "said disease" in the last line of claim 28 to give proper antecedent basis.

In claim 29, intratracheal administration needs "the" before it to give it proper antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1654

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 28, 29, 32-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Luniakin et al.

Luniakin teaches administering lysozyme to a patient for treating pneumonia.

Claims 28, 29, 32-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Weaver et al.

Weaver teaches administering lysozyme to treat cystic fibrosis. Since as noted by Weaver involvement of the lungs leads to pneumonia it would be inherent that when one treats cystic fibrosis one will also treat pneumonia.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 28-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weaver et al and Gavrilenko et al. taken with Kats et al.

The rejection is of record.

In response to the language "consisting essentially of" in the claim, applicant is

Art Unit: 1654

For the purposes of searching for and applying prior art under 35 U.S.C. 102 and 103, absent a clear indication in the specification or claims of what the basic and novel characteristics actually are, "consisting essentially of" will be construed as equivalent to "comprising." See, e.g., PPG, 156 F.3d at 1355, 48 USPQ2d at 1355 ("PPG could have defined the scope of the phrase consisting essentially of for purposes of its patent by making clear in its specification what it regarded as constituting a material change in the basic and novel characteristics of the invention."). See also *In re Janakirama-Rao*, 317 F.2d 951, 954, 137 USPQ 893, 895-96 (CCPA 1963). **If an applicant contends that additional steps or materials in the prior art are excluded by the recitation of "consisting essentially of," applicant has the burden of showing that the introduction of additional steps or components would materially change the characteristics of applicant's invention.** *In re De Lajarte*, 337 F.2d 870, 143 USPQ 256 (CCPA 1964). See also *Ex parte Hoffman*, 12 USPQ2d 1061, 1063-64 (Bd. Pat. App. & Inter. 1989) ("Although consisting essentially of is typically used and defined in the context of compositions of matter, we find nothing intrinsically wrong with the use of such language as a modifier of method steps. . . [rendering] the claim open only for the inclusion of steps which do not materially affect the basic and novel characteristics of the claimed method. To determine the steps included versus excluded the claim must be read in light of the specification. . . . [I]t is an applicant's burden to establish that a step practiced in a prior art method is excluded from his claims by consisting essentially of language.").

Type in bold is to show emphasis only.

Thus, the language "consisting essentially of" is interpreted to mean "comprising" unless applicant can show that the other ingredients in the references would materially change the fundamental characteristics of applicant's invention.

Claims 28-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Weaver et al. or Luniakin et al.

Both references each teach that lysozyme is administered to a patient having pneumonia or inherently has pneumonia as taught above in Weaver. To use a lysozyme
